AMENDMENTS

In the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original)   An artificial intellectual stock ordering system suited to deal with a stock ordering process, comprising:

an input unit for inputting transaction conditions;

an ordering computer coupled with the input unit, said ordering computer receiving the transaction conditions, and retrieving, analyzing and classifying news documents, assigning a grade to each news document, and outputting stock ordering information for ordering a stock purchase or sale, while the transaction conditions are matched and the grade is larger than a high value, or while the transaction conditions are matched and the grade is smaller than a low value;

an electronic news computer connected to the ordering computer through a first network suited to provide the news document; and

a security company computer connected to the ordering computer through a second network suited to receive the stock ordering information to buy or sell a stock.

2. (Original)   The system as claimed in claim 1, wherein the input unit comprises a keyboard.

2

3. (Original)   The system as claimed in claim 1, wherein the input unit comprises a mouse.

4. (Original)   The system as claimed in claim 1, wherein the transaction conditions comprise a glossy index.

5. (Original)   The system as claimed in claim 1, wherein the transaction conditions comprise an individual index.

6. (Original)   The system as claimed in claim 1, wherein the transaction conditions comprise an associated index.

7. (Original)   The system as claimed in claim 1, wherein the ordering computer comprises a network server.

8. (Original)   The system as claimed in claim 1, wherein the first network and the second network consist of the Internet, LAN and WAN.

9. - 14. (Cancelled)
